

LTM4633

High Efficiency, Triple Output Step-Down μ Module Regulator

DESCRIPTION

Demonstration circuit 1905B features the [LTM[®]4633EY](#), a high efficiency, triple output step-down power μ Module[®] regulator. The input voltage range is from 4.7V to 16V with a common input source, or 2.375V to 16V with an external bias supply. The output voltage range is 0.8V to 1.8V for channels 1 and 2, and 0.8V to 5.5V for channel 3. Derating is necessary for certain V_{IN} , V_{OUT} , frequency, and thermal conditions. See Table 1 for Thermally Viable Operating Conditions. The DC1905B offers access to the TRACK/SS pins, allowing the user to program output tracking or soft-start period. The board operates in

continuous conduction mode in heavy load conditions. For high efficiency at low load currents, the MODE jumper (JP4) selects pulse-skipping mode for noise sensitive applications or Burst Mode[®] operation in less noise sensitive applications. Channels 1 and 2 can be connected in parallel for a single 20A output solution with optional jumper resistors. The LTM4633 data sheet must be read in conjunction with this demo manual prior to working on or modifying demo circuit 1905B.

Design files for this circuit board are available.

Part marking is either ink mark or laser mark

PERFORMANCE SUMMARY

Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
Input Voltage Range		4.7		16	V
Output Voltages		1	1.2	$3.3 \pm 1.5\%$	V
Maximum Continuous Output Current	Derating is necessary for certain operating conditions (Refer to data sheet for details)	10A DC for channels 1 and 2, 8A DC for channel 3 (Note 1)			
Operating Frequency	$V_{IN} \geq 6\text{V}$ (Note 2)		600		kHz
Efficiency of Channel 1	$V_{IN} = 12\text{V}$, $V_{OUT1} = 1.0\text{V}$, $I_{OUT1} = 10\text{A}$		80 (See Figure 2)		%
Efficiency of Channel 2	$V_{IN} = 12\text{V}$, $V_{OUT2} = 1.2\text{V}$, $I_{OUT2} = 10\text{A}$		83 (See Figure 3)		%
Efficiency of Channel 3	$V_{IN} = 12\text{V}$, $V_{OUT3} = 3.3\text{V}$, $I_{OUT3} = 8\text{A}$		91 (See Figure 4)		%
Load Transient of Channel 1	$V_{IN} = 12\text{V}$, $V_{OUT1} = 1.0\text{V}$, $I_{STEP} = 0\text{A}$ to 5A		See Figure 5		
Load Transient of Channel 2	$V_{IN} = 12\text{V}$, $V_{OUT2} = 1.2\text{V}$, $I_{STEP} = 0\text{A}$ to 5A		See Figure 6		
Load Transient of Channel 3	$V_{IN} = 12\text{V}$, $V_{OUT3} = 3.3\text{V}$, $I_{STEP} = 0\text{A}$ to 5A		See Figure 7		

Note 1: For $V_{IN} > 12\text{V}$, 6A DC is maximum continuous output current when there is no forced airflow. See Table 1 for more details.

Note 2: For $V_{IN} < 6\text{V}$, to maintain constant frequency, remove R7 (to disconnect CNTL_PWR from V_{IN}) and apply 5V to CNTL_PWR and EXT V_{CC} .

QUICK START PROCEDURE

Demonstration circuit 1905B is an easy way to evaluate the performance of the LTM4633EY. See Figure 1 for the proper measurement equipment setup and follow the procedure below.

- Place jumpers in the following positions for a typical application:

JP1: RUN1 ON
JP2: RUN2 ON
JP3: RUN3 ON
JP4: MODE CCM

- With power off, connect the input power supply, loads, and meters as shown in Figure 1. Preset the load to 0A and V_{IN} supply to 12V.
- Turn on the power supply at the input. The output voltage of channel 1 should be $1.0\text{V} \pm 1.5\%$ (0.985V to 1.015V). The output voltage of channel 2 should be $1.2\text{V} \pm 1.5\%$ (1.182V to 1.218V). The output voltage of channel 3 should be $3.3\text{V} \pm 1.5\%$ (3.25V to 3.349V).
- Vary the input voltage from 4.7V to 16V and adjust the load current from 0A to 10A for channels 1 and 2 and from 0A to 8A for channel 3. See Table 1 for Thermally Viable Operating Conditions. Observe the output voltage regulation, ripple voltage, efficiency, and other parameters.

- (Optional) For the optional load transient test, apply an adjustable pulse signal between IOSTEP_CLK and GND test points. The pulse amplitude sets the load step current amplitude. Keep the pulse width short ($<1\text{ms}$) and pulse duty cycle low ($<5\%$) to limit the thermal stress on the load transient circuit. Switch the jumper resistors R30, R31, or R34 (on the backside of boards) to apply load transient on channels 1 and 2, or channel 3, respectively.
- (Optional) The LTM4633 can be synchronized to an external clock signal. Place the JP4 jumper on EXT_CLK and apply a clock signal (0V to 5V, square wave) on the CLKIN test point.
- (Optional) The outputs of the LTM4633 can track another supply. If tracking external voltage is selected, the corresponding test points, TRACK1, TRACK2, and TRACK3, need to be connected to a valid voltage signal.
- (Optional) Channels 1 and 2 can be connected in parallel for a 20A on the DC1905B. Install 0Ω resistors on R32, R33, R35, R36, and remove R15. The output voltage is set by R4 based on Equation 1.

$$V_{OUT} = 0.8\text{V} \cdot \frac{1 + \frac{60.4\text{k}}{R4}}{2} \quad (1)$$

QUICK START PROCEDURE

QUICK START PROCEDURE

Table 1. Thermally Viable Operating Conditions

VIN (V)	LOAD ON (A)			FORCED AIRFLOW (LFM)	MODULE HIGH TEMP (°C)
	CH1	CH2	CH3		
12	10	10	3	0	81.3
12	10	10	3	200	67.6
12	10	10	5	0	89.5
12	10	10	8	0	99.1
12	10	10	8	200	78.4
12	10	10	8	400	71.6
16	10	10	3	0	91.0
16	10	10	3	200	74.3
16	10	10	5	0	94.8
16	10	10	6	0	98.0
16	10	10	8	200	85.4
16	10	10	8	400	76.5
5	10	10	3	0	74.6
5	10	10	8	0	88.3
5	10	10	8	200	71.1
5	10	10	8	400	63.2

NOTES:

Ambient Temperature = 23.9°C to 24.5°C.

No Heat Sink.

VOUT1 = 1V; VOUT2 = 1.2V; VOUT3 = 3.3V.

fSW = 600kHz (For VIN < 6V: Remove R7 and apply 5V to CNTL_PWR and EXT_VCC).

Board ran under each condition until the temperatures settled.

Thermal images were captured using the Fluke Ti401 Pro Thermal Camera.

Top of the module was painted with white-out to show the true temperatures on the thermal image.

This table reflects the unmodified demo board DC1905B only.

Thermally viable conditions for final customer designs will vary based on the characteristics of the actual design.

Never take the package temperature above 100°C.

**ESD Caution**

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
